INVESTMENT CRITERIA

In our bottom-up investment process, the first priority is to identify eligible companies based on their qualitative attributes. We believe companies that meet our demanding investment criteria are better positioned to withstand periods of economic or financial market weakness and compound capital at attractive rates over time.

Business Attributes:

- Loyal customers
- Essential products and services you “Have to Have”
- Leadership in attractive markets
- Sustainable competitive advantages

Management Attributes:

- Strong operators with integrity
- Disciplined capital allocation

Financial Attributes:

- High returns on capital
- Strong balance sheet and cash flow

We evaluate environmental, social and governance (ESG) factors as part of our investment research process to help us effectively assess the long-term sustainability and durability of our companies and credits.

The Fund will generally hold investments in 20-35 companies with market capitalizations greater than \$5 billion that are headquartered in North America, as well as in certain global firms located in other developed regions. The targeted holding period is three to five years. Investments are typically sold if they appreciate to levels near BBH’s estimate of intrinsic value.
