

BBH Luxembourg Funds - BBH Income Fund

Fund Fact Sheet / 4Q 2022

For Professional / Non-Retail Use Only
in Germany, Luxembourg and the UK

PRINCIPAL STRATEGY AND OBJECTIVES

The BBH Luxembourg Funds – BBH Income Fund (the “Fund”) will primarily invest in a well-diversified portfolio of fixed and floating or variable rate debt instruments.

The Fund will be actively managed and will not measure its performance success nor alter its construction in relation to any particular benchmark or index. The Fund will seek to provide investors with maximum total return, with an emphasis on current income, consistent with preservation of capital and prudent investment management. The Fund will have the flexibility to invest in the sectors, industries, securities and durations the investment manager of the Fund identifies as offering attractive risk-adjusted return potential consistent with the Fund’s investment objective.

INVESTMENT CRITERIA

The Fund shall predominantly invest in:

- Notes and bonds issued by U.S. and non-U.S. corporations, financial institutions, the U.S. government, its agencies, and government guaranteed issuers;
- U.S. Dollar-denominated Investment-Grade securities issued by U.S. and non-U.S. corporations and financial institutions;
- Asset-backed securities, commercial mortgage-backed securities, and residential mortgage-backed securities; and
- Money market instruments, repurchase agreements, commercial paper, and, for hedging purposes, derivative instruments to meet the Fund’s investment objective.

SECURITY SELECTION

BBH Investment Management (IM) applies a disciplined investment selection process focused on the following attributes:

- The Fund will generally concentrate its exposures in corporate and asset-backed securities, but may contain a portion of government debt.
- BBH will independently analyze the creditworthiness of all non-U.S. Treasury securities.
- Corporate and asset-backed holdings will be well-diversified.

PRINCIPLES OF FIXED INCOME INVESTING

- **Investment Objective:** The Fund seeks to provide maximum total return with an emphasis on current income consistent with preservation of capital and prudent investment management.
- **Emphasis on Capital Preservation:** The Fund is managed to earn most of its return through interest received on the fixed income securities it owns. The Fund will purchase those securities that, through the independent analysis of BBH and its investment management team, are believed to be highly unlikely to be subject to material price declines due to credit quality deterioration
- **Diversification:** For reference purposes only, it is intended that the Fund would typically invest in Credits¹ that are reasonably diversified by industry sector.
- **Long-term Perspective:** Many investment strategies are built around short-term expectations, momentum following, and frequent trading. We believe that a longer-term view of both companies and investments leads to stronger results and risk control over market cycles.

¹ Obligations such as bonds, notes, leases and other forms of indebtedness, except for Cash and Cash Equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation.

FUND MANAGERS

Andrew P. Hofer

Andrew Hofer is Head of Taxable Fixed Income for Investment Management. Since joining BBH in 1988, Andrew has held a variety of roles within Investment Management, including the Head of Insurance Asset Management, Chief Operating Officer, and Head of Risk Management. Portfolio holdings and characteristics are subject to change. Totals may not sum due to rounding. An investment is in shares of the Fund and not in any underlying investment owned by the Fund. Credit Quality letter ratings are provided by Standard and Poor's, Moody's and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit Ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co. Credit ratings reflect the credit quality of the underlying issues in the portfolio and not of the portfolio itself. Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

The Fund is actively managed. Under normal circumstances, the Fund is managed with the intention of maintaining an effective duration of between 80%-120% of the effective duration of Bloomberg US Aggregate Index.

Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fee and expenses.

The Bloomberg U.S. Aggregate Index covers the USD-denominated, investment-grade (rated Baa3 or above by Moody's), fixed-rate, and taxable areas of the bond market. This is the broadest measure of the taxable U.S. bond market, including most Treasury, agency, corporate, mortgage-backed, asset-backed, and international dollar-denominated issues, all with maturities of 1 year or more. Investments cannot be made in an index.

"Bloomberg@" and the Bloomberg U.S. Aggregate Index are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). RISKS

Investors in the Fund should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, maturity, call and inflation risk; investments may be worth more or less than the original cost when redeemed. Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Asset-Backed Securities ("ABS") are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the ABS being structured in ways that give certain investors less credit risk protection than others.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

Below investment grade bonds, commonly known as junk bonds, are subject to a high level of credit and market risks.

Non-U.S. investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards. Prices of emerging market securities can be significantly more volatile than the prices of securities in developed countries, and currency risk and political risks are accentuated in emerging markets.

The Fund may engage in certain investment activities that involve the use of leverage, which may magnify losses.

A significant investment of Fund assets within one or more sectors, industries, securities and/or durations may increase its vulnerability to any single economic, political, or regulatory developments, which will have a greater impact on the Fund's return.

Illiquid investments subject the Fund to the risk that it may not be able to sell the investments when desired or at favorable prices.

There is no assurance the Fund will achieve its investment objectives.

Complete information on the Fund's risks and expenses can be found in the prospectus.

The decision to invest in the fund should take into account all the characteristics or objectives of the fund as described in its prospectus.
