

CAPITAL PARTNERS

BBH Luxembourg Funds - BBH Short Duration

Quarterly Update | 2Q 2026

2Q Highlights

- The Fund had a positive return during the quarter, with rate and sector effects driving performance.
- Credit valuations became less attractive during the quarter as credit spreads of every major market sector narrowed.
- Prolonged periods of low credit spreads and subdued volatility are not new to the fixed income markets. In these environments, we find that executing a selective, bottom-up selection process can help investors perform through the inevitable spread widening that will occur.

PERFORMANCE

Past performance does not predict future results

Fund/benchmark	Annual returns									
	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
Class A	5.14%	6.15%	7.20%	-1.46%	1.30%	3.18%	4.09%	1.72%	1.99%	2.50%
Bloomberg U.S. 1-3 Year Treasury Bond Index	5.17%	4.03%	4.29%	-3.82%	-0.60%	3.16%	3.59%	1.56%	0.42%	0.86%

AS OF 30 JUNE 2026

Fund/benchmark			Average annual total returns				
	3 mo.	YTD	1 yr.	3 yr.	5 yr.	10 yr.	Since inception
BBH Short Duration - Class A Shares	1.06%	1.61%	4.14%	5.73%	3.70%	3.22%	2.60%
Bloomberg U.S. 1-3 Year Treasury Bond Index	0.37%	0.64%	2.92%	4.38%	1.90%	1.75%	1.53%

Class A Inception: 31/01/2013

Class A Ongoing Annual Charges: 0.50%

Class I shares redeemed 06/09/2023

Returns of less than one year are not annualized.

The ongoing charges may vary from year to year. While the Prospectus indicates an ability by the Investment Manager or Principal Distributor to charge a maximum of 3% of the subscription price upon entry / 1% of the total redemption proceeds, we have not and do not plan to impose this charge. Performance has been calculated in USD.

Market environment

Fixed income indices gained during second quarter 2026 as yields were cushioned by narrowing credit spreads against the impact of rising interest rates. Year to date, index returns have been paltry as interest rates rose and credit spreads hovered near historical lows. Credit excess returns over similar duration Treasuries were generally positive across sectors during the quarter and year to date.

Credit performance seems disconnected from the headlines. Inflationary concerns persist and have dissipated any prospective rate cut beliefs. U.S. consumer sentiment remains weak due to deepening concerns over affordability. The business uncertainties stemming from artificial intelligence (AI) disruption continue to loom. All of this is occurring as the Federal Reserve (the Fed) undergoes a change in leadership under new Chairman Kevin Warsh, who created task forces to focus on the Fed's approaches to communications, balance sheet policy, data quality and timeliness, productivity and jobs, and inflation frameworks.

The overall impact on credit market fundamentals has been limited. U.S. consumers appear challenged but resilient, with consumer debt losses and delinquency rates hovering at historically normal levels. The default rates of high-yield bonds and loans appear to have stabilized at manageable levels. Private credit default rates are declining, as are concerns over an imminent broad-based surge in default activity. All of this is also occurring in a market where strong companies can easily access debt capital.

Higher interest rates have commanded investors' attention, with fixed income funds experiencing inflows at a rapid pace. At the same time, credit issuance hit record-setting highs across several sectors and issuers were met with strong demand and low risk spreads. Volumes of investment grade corporate bonds increased 24%, high-yield bonds increased 21%, loans rose 25%, asset-backed securities (ABS) increased 18%, and nonagency commercial mortgage-backed securities (CMBS) increased 30% year over year. Even volumes of debt tied to private credit rose strongly. New issue private credit collateralized loan obligation (CLO) issuance increased 10% and business development company (BDC) debt volumes rose 63% from last year's pace. The theme of issuance tied to the buildout of AI infrastructure continued and intensified, with full-year forecasts for total credit issuance tied to financing AI ambitions rising 15% from the levels predicted at the start of the year.

Past performance does not guarantee future results.

Source: Bloomberg, J.P. Morgan, Palmer Square, ICE, Bank of America, BBH.

Unless otherwise noted Excess Returns are the returns in the excess of duration matched Treasuries.

¹ Excess return computed by BBH as total return less the return of the Bloomberg 3 Month T-Bill Bellwether Index, a proxy for the duration profile of floating-rate leveraged loans and CLO debt. ICE = Intercontinental Exchange; CLO = Collateralized Loan Obligation; ABS = Asset-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; MBS = Mortgage-Backed Securities; TIPS = Treasury Inflation Protected Securities; EM = Emerging Markets.

EXHIBIT II: OUTLOOK BY SECTOR

Sector	Outlook	Positioning
Reserves		
U.S. Treasuries/futures/reserves	Hold when attractive credits unavailable	Held to balance yield curve and duration exposures
Government-related	Unattractive valuations; better opportunities elsewhere	No positions in portfolios
Structured credit		
U.S. MBS	No purchase opportunities in 15- or 30-year pools	No positions in portfolios
RMBS	Continued credit, technical, and valuation concerns	No positions in portfolios
CMBS	Spreads remain attractive and opportunities exist across several property types of SASB deals	Hold issues of SASB and Freddie K securitizations with strong durability and transparency
ABS	Nontraditional spreads narrowed but remain above cyclical lows	Hold positions across diversified set of nontraditional segments, with recent purchases of data center ABS, triplet net lease ABS, broadly syndicated loan CLO, and personal consumer loan ABS
Corporate credit		
IG corporate bonds	Spreads narrowed back to historically low levels	Holdings remain in shorter duration bonds, companies in interest rate sensitive sectors, and idiosyncratic opportunities
Corporate loans	Opportunities remain in smaller issuers as default rates near longer-term averages	Newer purchases include loans of companies in the midstream energy, technology, healthcare, and manufacturing sectors
HY corporate bonds	Spreads of "BB" and "B" issues narrowed but opportunities remain	Identified newer opportunities in bonds of companies in the pharmaceutical, technology, and specialty lending industries
Other credit		
Municipal	Valuations of select municipals are attractive for inclusion in taxable portfolios	Minimal holdings in portfolios
Emerging markets	Concerns remain about creditor rights in most emerging market countries	No positions in portfolios

As of 30 June 2026. Portfolio holdings and characteristics are subject to change.

MBS = Mortgage-Backed Securities; RMBS = Residential Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield; SASB = Single Asset, Single Borrower; REIT = Real Estate Investment Trust
Source: BBH

Fundamentals indicate healthy performance of credits tied to borrowing by corporations, consumers, and commercial real estate operators. Default rates of high-yield corporate bonds and loans sit near their longer-term averages. Measures of private credit default activity fall in a range of 3% to 5%, higher than recent lows but consistent with long-term averages. Many types of consumer loans – including credit cards, autos, unsecured loans, and home improvement loans – report default and delinquency rates consistent with historical experience. Commercial real estate loan performance has steadied, with banks reporting minimal charge-offs and losses. Credit performance in single-asset single-borrower (SASB) deal structures has normalized, with delinquency rates stabilizing and losses remaining low.

Valuations

Credit valuations became less attractive during the quarter as credit spreads of every major market sector narrowed. The percentage of corporate bonds screening as potential "buy" opportunities for BBH decreased to 7% from 10% for investment grade and to 22% from 23% for high yield. In the loan market, however, the percentage of issues screening as a "buy" candidate increased to 62% from 55% last quarter. No coupon cohort of the agency

MBS market screened as a “buy” candidate according to our Valuation Framework.¹ In the structured credit markets, spreads narrowed but remain above historical lows. Spreads of nontraditional ABS remain above cyclical lows, and SASB CMBS spreads remain closer to their historic medians. Debt spreads of broadly syndicated loan (BSL) CLOs narrowed and sat near cyclical lows. Spreads of debt tied to private credit narrowed during the quarter, while middle-market CLO and BDC bond spreads declined to levels closer to cyclical lows after rising briefly last quarter amid concerns tied to software company exposures and elevated redemption requests.

There are pockets of opportunities throughout the credit markets, though selectivity is imperative. Within the investment grade corporate bond market, over 40% of finance company and life insurance names meet our criteria for purchase, and opportunities remain in bonds maturing under five years. In the high-yield bond market, over half of the automotive and finance company industries screen as “buy” opportunities, while an abundance of loans to cable satellite, broadcasting, and technology companies screen favorably, to name a few. Opportunities emerged in several structured credit sectors, including ABS backed by data centers, personal consumer loans, triple net leases, fiber optic networks, SASB CMBS, and BSL CLOs.

Performance

The Fund had a positive return during the quarter, with rate and sector effects driving performance. The Fund’s defensive duration positioning contributed to total and relative returns as interest rates rose during the quarter. Favorable sector effects were driven by exposures within holdings of corporate bonds. Selection results contributed to performance, with positions in corporate bonds to healthcare, life insurance, and health insurance companies impacting results favorably. Corporate bonds to finance companies and construction machinery companies detracted modestly from selection effects.

Transaction summary

We continued to find durable credits² offering attractive value even as valuations reflect a growing belief that the U.S. economy is slowing. The table below summarizes a few notable portfolio additions.

EXHIBIT III: FUND ATTRIBUTION

	Average weight (%)	Contribution (basis points)		
		Rates	Sector	Selection
Total portfolio	100.0%	64	47	7
Reserves	12.6%		0	0
Municipal	0.9%		0	0
U.S. MBS	0.1%		0	0
CMBS	0.0%		0	0
IG corporate bonds	82.5%		41	4
HY corporate bonds	3.9%		6	3

Past performance does not predict future results

Contribution figures are presented gross of fees

Data reported quarterly from 31 March 2026 to 30 June 2026

Basis point or “bp” is 1/100th of a percent (0.01% or 0.0001)

CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield

Source: BBH

¹ Our valuation framework is a purely quantitative screen for bonds that may offer excess return potential, primarily from mean reversion in spreads. When the potential excess return is above a specific hurdle rate, we label them “Buys” (others are “Holds” or “Sells”). These ratings are category names, not recommendations, as the valuation framework includes no credit research, a vital second step.

² Obligations such as bonds, notes, loans, leases, and other forms of indebtedness, except for cash and cash equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation. Durable means the ability to withstand a wide variety of economic conditions.

EXHIBIT IV: TRANSACTION SUMMARY

MBS = Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; REIT = Real Estate Investment Trust; SOFR = Secured Overnight Financing Rate, which is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities.

Source: BBH

Characteristics

The Fund's duration was lower than its index, as its duration is managed to preserve capital over shorter term horizons. Over the quarter, holdings within investment grade corporate bonds decreased 11%, holdings within high-yield corporate bonds decreased 1%, and holdings of reserves increased 12%. The Fund held ~3% in high-yield and nonrated credit instruments, most of which are BB-rated.

Concluding remarks

Prolonged periods of low credit spreads and subdued volatility are not new to the fixed income markets. In these environments, we find that executing a selective, bottom-up selection process can help investors perform through the inevitable spread widening that will occur. Though no one knows when or why spreads will widen, we believe investing in durable credits with careful attention to valuations, appropriate debt structuring, transparency afforded to investors, and the caliber of management serve investors' long-term interests well regardless of the prevailing environment.

Sincerely,

Andrew P. Hofer
Fund Co-Manager

Opinions, forecasts, and discussions about investment strategies represent the author's views as of the date of this commentary and are subject to change without notice. References to specific securities, asset classes, and financial markets are for illustrative purposes only and are not intended to be, and should not be interpreted as recommendations.

Purchase and sale information provided should not be considered as a recommendation to purchase or sell a particular security and that there is no assurance, as of the date of publication, that the securities purchased remain in a fund's portfolio or that securities sold have not been repurchased. Nothing contained herein is intended as a recommendation to buy or sell any security, or to invest in any particular country, sector or asset class.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types.

Holdings are subject to change. Totals may not sum due to rounding.

An investment in shares of the Fund and not in any underlying investment owned by the Fund.

Credit Quality letter ratings are provided by Standard and Poor's, Moody's and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit Ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co. Credit ratings reflect the credit quality of the underlying issues in the portfolio and not of the portfolio itself. Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates. Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

Weighted Average Life of securities excludes US Treasury futures positions.

The Fund is actively managed. Under normal circumstances, the Fund is managed with the intention of maintaining an effective duration of between 80%-120% of the effective duration of Bloomberg US Aggregate Index.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types

Definitions

Bloomberg US Aggregate Bond Index is a market value-weighted index that tracks the daily price, coupon, pay-downs, and total return performance of fixed-rate, publicly placed, dollar-denominated, and non-convertible investment grade debt issues with at least \$300 million par amount outstanding and with at least one year to final maturity.

An index is not available for direct investment.

"Bloomberg®" and the Bloomberg indexes are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the indexes (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). Bloomberg is not affiliated with BBH, and Bloomberg does not approve, endorse, review, or recommend the BBH Luxembourg Funds - BBH Short Duration Fund. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the fund.

Risks

Investors in the Fund should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, maturity, call and inflation risk; investments may be worth more or less than the original cost when redeemed. Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Bond prices may be sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices. Investing in the bond market is subject to certain risks including market, interest-rate, issuer, maturity, call, credit, and investments may be worth more or less than the original cost when redeemed.

Asset-Backed Securities ("ABS") are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the ABS being structured in ways that give certain investors less credit risk protection than others.

SASB lacks the diversification of a transaction backed by multiple loans since performance is concentrated in one commercial property. SASBs may be less liquid in the secondary market than loans backed by multiple commercial properties.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

Non-U.S. investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Adverse exchange rate fluctuations may result in a decrease in return or a loss for shareholders.

Illiquid investments subject the Fund to the risk that it may not be able to sell the investments when desired or at favorable prices.

There is no assurance the Fund will achieve its investment objectives.

The objective of the Fund is to provide investors with maximum total return, consistent with preservation of capital and prudent investment management.

Complete information on the Fund's risks and expenses can be found in the prospectus.

The decision to invest in the fund should take into account all the characteristics or objectives of the fund as described in its prospectus.

Other Important Disclosures

Brown Brothers Harriman & Co. ("BBH") is the promoter and principal distributor of the Funds. BBH Credit Partners, LLC, a subsidiary of BBH, is the investment adviser to the fund. BBH Luxembourg Funds (the "Company") is a Luxembourg-registered Société d'Investissement à Capital Variable - undertaking for collective investment in transferable securities (SICAV-UCITS) regulated by the Commission de Surveillance du Secteur Financier ("CSSF"), the Luxembourg financial services authority. The SICAV designated FundRock Management Company S.A. to serve as its designated management company in accordance with Chapter 15 of the Luxembourg Law of 17th December 2010; FundRock Management Company S.A. was incorporated on 10 November 2004 for an unlimited duration under the laws of Luxembourg and registered on the official list of Luxembourg management companies.

Either Brown Brothers Harriman or FundRock may terminate arrangements for marketing under the denotification process in the new Cross-border Distribution Directive (DirectiveEU) 2019/1160.
