## Risks

Investors in the Fund should be able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions, and other political, social, and economic developments.

The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services.

The Fund may assume large positions in a small number of issuers which can increase the potential for greater price fluctuation.

Non U.S. investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

There can be no assurance the Fund will achieve its investment objectives.

**Complete information on the Fund's risks and expenses can be found in the prospectus, which you should read carefully before investing.**
